

# INTRODUCTION

Established in 2006, Comp Environmental, Inc (CE) has provided valued and dependable services to both Federal and State governmental entities. Founder Caroline Wang, P.E., M.B.A. has focused on a wide variety of services, especially related to the Everglades Restoration Program in Florida.

CE combines technologies with experiences in electronic/electrical engineering, controls/automation and instrumentation for environmental protection/improvements. CE also specializes in electrical contracting and tele-communication. CE is continuously delivering project outcomes that meet or surpass client expectations, and has gained repeat service requests from our prime contractors and clients.

CE has the focused business direction in electrical and environmental engineering, with specialties of environmental data collection and analysis, control/communication system construction and rehabilitation, and O&M of pump station and water control structures. CE is an SBA Economically Disadvantaged Woman-Owned Small Business (EDWOMSB). Located in Orlando, Florida, CE is fully supported by a team of professionals including water resource engineers, control/electrical engineers, GIS/database specialists, and construction managers.
